ANNUAL REPORT OF THE PUBLIC SERVICE COMMISSION
OF SOUTH CAROLINA

To the General Assembly of South Carolina:

The Public Service Commission has the honor to respectfully submit for your consideration this its One Hundred and Ninety Seventh Annual Report.

Below is the listing of the present Commissioners and the Counties comprising their districts:

First District

William "Bill" Saunders.....Charleston, S.C.
Beaufort, a portion of Berkeley, Charleston, Colleton,
Dorchester, Hampton, Jasper

Second District

C. Dukes Scott.....Columbia, S.C.
Bamberg, Calhoun, Lexington, Orangeburg, Richland

Third District

Guy Butler, Vice Chairman.....Greenwood, S.C.
Abbeville, Aiken, Allendale, Anderson, Barnwell,
Edgefield, Greenwood, McCormick, Oconee, Pickens,
Saluda

Fourth District

Philip T. Bradley.....Greenville, S.C.
Greenville, Spartanburg, Union

Fifth District

Cecil A. Bowers.....Camden, S.C.
Cherokee, Chester, Chesterfield, Fairfield, Kershaw,
Lancaster, Laurens, Lee, Newberry, Sumter, York

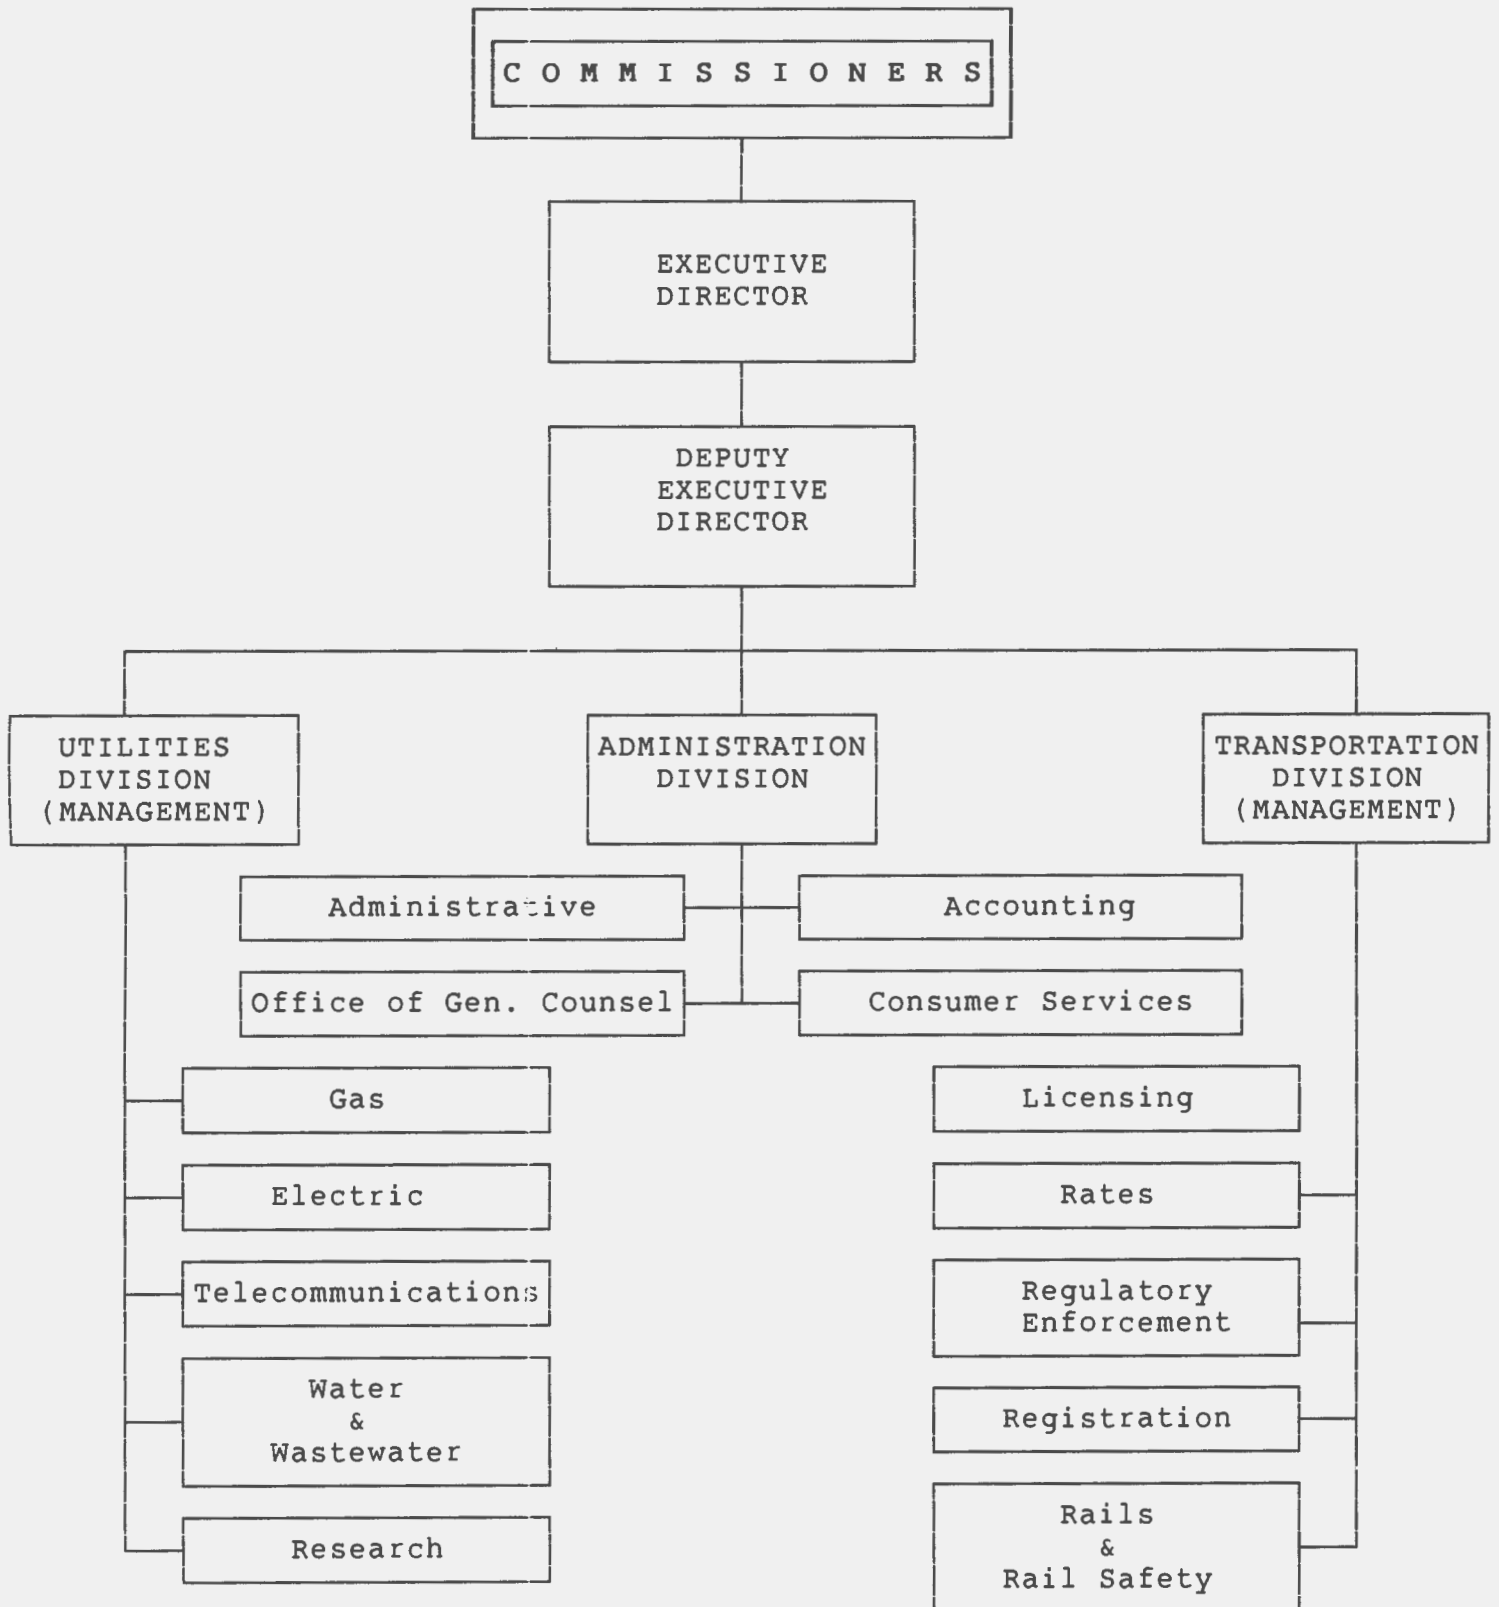

Sixth District

Warren D. Arthur, IV.....Hartsville, S.C.
A portion of Berkeley, Clarendon, Darlington, Dillon,
Florence, Georgetown, Horry, Marion, Marlboro,
Williamsburg

At Large

Rudolph Mitchell, Chairman.....Saluda, S.C.

THE SOUTH CAROLINA PUBLIC SERVICE COMMISSION

KEY COMMISSION PERSONNEL

Listed below are the names and titles of the responsible Commission Staff members and key personnel:

Charles W. Ballentine.....Executive Director

Gary E. Walsh.....Deputy Executive Director

Jimmy W. Wood.....Controller

Carolyn C. Nelson.....Director, Personnel

F. David Butler.....General Counsel

William P. Blume.....Manager, Accounting Department

D. Wayne Burdette.....Assistant Manager, Accounting
Department

April B. Sharpe.....Manager, Consumer Services
Department

Richard L. Smith.....Director, Utilities Division

R. Glenn Rhyne.....Assistant Director, Utilities
Division

A. R. Watts.....Chief, Electric Department

James S. Stites.....Chief, Gas Department

James M. McDaniel.....Chief, Telecommunications
Department

Charles A. Creech.....Chief, Water and Wastewater
Department

James Spearman.....Assistant Public Utilities Economist,
Research Department

A. Randy Griffin.....Director, Transportation
Division

William C. Sheely, Jr.....Assistant Director
Transportation Division

Rosa Stephens.....Chief, Licensing Department

Robert McMillan.....Chief, Rates Department

Johnny Lane

James Kinard.....Captains, Law Enforcement and
Safety Department

Linda S. Land.....Chief, Registration Department

Gordon W. Eckley.....Chief, Rails and Rail Safety
Department

STATUTORY AUTHORITY OF
THE PUBLIC SERVICE COMMISSION OF SOUTH CAROLINA

Utility regulation in South Carolina had its beginning with the passage of an Act by the 1878 General Assembly, creating a Railroad Commission for the purpose of regulating railroads operating within the State. The first Commissioner was appointed December 24, 1878, by the then Governor Wade Hampton.

The General Assembly in 1910 established a Public Service Commission, empowering it with the authority to "fix and establish in all cities of the State rates and charges for the supply of water, gas or electricity furnished by any person, firm or corporation to such cities, the inhabitants thereof, and to prescribe penalties."

The 1922 General Assembly combined the two three-member commissions and added one additional commissioner to form the present seven-member commission. The name was changed in 1934 to the Public Service Commission.

The Commission is elected by the Joint Assembly for a term of four years, one from each of the six Commission Districts and one Commissioner at-large.

The Commission is composed of the Administration, Transportation, and Utilities Divisions.

The Commission, as provided for by the South Carolina Constitution and as vested with power and jurisdiction by the South Carolina General Assembly, performs the following general functions:

1. Regulation and supervision of investor-owned electric utilities as to rates, charges, services, facilities, practices, accounting procedures, the purchase, sale and lease of utility property and the issuance of securities; and the administration of the Rural Electric Cooperative Act, relative to territorial boundaries. S.C. Code Ann., Section 58-27-10 et. seq., (1976), as amended; and Reg. 103-300, et. seq. Also the Utility Facility Siting and Environmental Protection Act (1971), S.C. Code Ann., Section 58-33-10, et seq.

2. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all intrastate investor-owned gas, street railway, water and sewerage companies; and the administration of the Gas Safety Act of 1970. S.C. Code Ann., Sections 58-5-10 et. seq. (1976), as amended; Reg. 103-400 et. seq.; Reg. 103-500 et. seq.; Reg. 103-700 et. seq.

3. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all telephone companies within the State. S.C. Code Ann., Section 58-9-10 et. seq., (1976), as amended; Reg. 103-600 et. seq.

4. Regulation and supervision of rates and charges, services, facilities, practices and accounting procedures of all radio common carriers within the State. S.C. Code Ann., Sections 58-11-10 et. seq. (1976), as amended.

5. Regulation and supervision of for hire motor carriers of freight and passengers relative to rates, schedules, rules, charges and facilities; issuance and supervision of the administration of Certificates of Public Convenience and Necessity; administration of Registration and Safety Act of 1970 and Sections 58-23-1110, et. seq. (1976), as amended; S.C. Code Ann., Sections 58-23-10 et. seq., (1976), as amended; Regs. 103-100, 103-200, et. seq.

6. Regulation and supervision of express and telegraph companies. S.C. Code Ann., Sections 58-9-2310 et. seq. (1976), as amended.

7. Regulation and supervision of services and facilities of railroads and railways. S.C. Code Ann., Section 58-17-170 et. seq., (1976), as amended; Commission Rules governing service supplied by rail companies.

SUMMARY OF ACTIVITIES DURING YEAR 1993-1994

During the past fiscal year, the Transportation Division dispensed license tags to 18,932 operating units varying in price from \$7.50 to \$125.00 each, according to payload. The various license tag fees assessed produced revenues of \$1,312,000.00.

As of December 31, 1993, 151 electric, gas, telephone, and radio common carrier utilities were operating within the State with a total plant investment of \$12.7 billion generating gross revenues of \$5.1 billions. The 93 water and sewerage companies operating within the State generated \$26.9 million of gross revenues.

From the tremendous growth of industry in the State in the past several years, coupled with the expanding economy, as evidenced by the above figures, conservative projections indicate that utility installations will more than double within the next ten years. During the past fiscal year, the Commission processed 1,756 complaints; hearings were held thereon when necessary, and over 1,233 Orders were issued overall.

SUMMARY OF EXPENDITURES

A. EXPENDITURES

I. Administration.....	2,402,646
II. Utilities.....	938,986

TOTAL FUNDS.....	<u>5,829,312</u>

The Public Service Commission hereby states that it did not purchase any energy conservation products that had not been certified by the State Energy Office.

I. THE ADMINISTRATION DIVISION

The following four departments are included in the Administration Division:

- ° Administrative Department
- ° Office of General Counsel
- ° Accounting Department
- ° Consumer Services Department

The activities of the Administration Division for the fiscal year 1993-1994 are summarized by each Department on the following pages of this Report:

A. THE ADMINISTRATIVE DEPARTMENT

The functions and responsibilities of the Administrative Department are as follows:

1. Maintains formal docket control which includes the receipt of all Petitions, docket matters that come before the Commission, notifies the public of such request, determines the time required to hear a matter, sets hearings on official calendar and notifies parties of record of hearing dates.
2. Custodian of all official papers and records of the Commission and certifies same.
3. Personnel - supervises and administers the personnel program of the Commission.
4. Budget - supervises the planning and directs preparation of the budget submitted to the Budget and Control Board; supervises financial control of expenditures in accordance with fiscal appropriations.
5. Purchasing - supervises the purchasing of all supplies and equipment, equipment inventory and the maintenance of records for the Commission.
6. E.E.O.C. - acts for the Commission as liaison with the State Human Affairs Commission.
7. Supervises Hearing Reporters of the Commission.
8. Consumer Services - processes complaints against utility and transportation companies.

The Administrative Department docketed 777 matters which came before the Commission during the 1993-1994 fiscal year. Numerous filings, such as motions, petitions, and various requests, were posted to these dockets for the Commission's consideration. The three hearing reporters transcribed the testimony and received evidence in the 64 hearings held before the Commission, including performing their duties at the night hearings held so that the public may have the opportunity to express their views before the Commission.

B. OFFICE OF THE GENERAL COUNSEL

The Office of General Counsel performs the following functions:

- (a) Represents and appears for the people of the State and the Commission Staff in all actions and proceedings involving any question of general and public interest within the jurisdiction of the Commission and, if directed to do so by the Commission, intervenes, if possible, in any action or proceeding in which any such question is involved;
- (b) Commences, prosecutes and expedites the final determination of all actions and proceedings directed or authorized by the Commission;
- (c) Advises the Commission Staff and each Commissioner, when so requested, in regard to all matters connected with powers and duties of the Commission and the members thereof;
- (d) Generally performs all duties and service as attorney to the Commission which the Commission may require of it.

Attorneys in the Office of the General Counsel represented the Commission Staff in 114 hearings and Commission meetings before the Commission during the 1993-1994 fiscal year. These hearings and meetings involved both Utility Division and Transportation Division matters and included issues ranging from billing disputes to major rate increases to applications for certificates of public convenience and necessity. The Office of the General Counsel also participated in informal proceedings along with Commission Staff members and the interested parties for the purpose of resolving complaints or inquiries or for the purpose of gathering information in matters arising under the jurisdiction of the Commission.

During the 1993-1994 fiscal year, the Office of the General Counsel had decisions rendered in appeals before the Circuit Court of South Carolina and the State Supreme Court. Several cases were pending before both Courts. The Office of the General Counsel filed various petitions and comments on behalf of the Commission before the Federal Communications Commission, Federal Energy Regulatory Commission and the Interstate Commerce Commission.

C. ACCOUNTING DEPARTMENT

The Accounting Department is composed of fifteen Public Utility Accountants, one Rate Analyst, one Project Administrator, and one Administrative Specialist, who all report to the Accounting Director.

The Accounting Department's primary function is to examine the books and records of Utility and Transportation Companies which are requesting an increase or changes in rates. A rate case examination implements principles and procedures based upon regulatory laws and in this respect differs from audits conducted by a Company's public accountants. After their examination, the Staff makes adjustments in the company's operations to achieve a "normalized" test year. Staff's exhibits and testimony are directed toward the company's operations and Staff's adjustments. Based on the Staff's audit report and the company's information, the Commissioners are able to determine an equitable rate of return on the company's investment.

The Accounting Department also is responsible for performing compliance audits of both Utility and Transportation companies' books and records. Primary attention is placed on the determination of the proper rates of return, operating margins or operating ratios, which the audited companies are earning. Such audits can lead to show cause hearings in which Staff will offer testimony as to their findings.

The Staff's audit also insures that proper cutoffs of the test year are implemented as well as substantiating that revenues, expenses, and rate items are allocated according to proper jurisdiction. Employing the necessary procedures, Staff verifies the utility's operations and verifies the books and records to the filing and related exhibits.

Emphasis is placed by Staff upon policies and procedures and the instructions thereto, as stated in the Chart of Accounts for the various types of regulated companies. The Chart of Accounts outlines which revenues, expenses, and asset accounts will be ultimately used to determine the company's rate of return on investment, operating margins or operating ratios.

After completing their examination, a report is prepared by Staff with exhibits and a written explanation of each of the exhibits. Copies of the report are distributed to each Commissioner, the Company, Intervenor, other members of the Staff, and all other parties of record. A member of the Staff will testify before the Commission and submit the Report into evidence during the hearing.

The Accounting Department also reviews the changing prices attributable to fuel prices. Specifically electric companies utilize a fuel adjustment clause and gas companies use a purchased gas adjustment clause. The Department semiannually monitors fuel costs, performs audits, prepares reports and participates in formal hearings before the Commission centering around escalating fuel costs. Audits related to refunds from gas suppliers back to South Carolina jurisdictional ratepayers are also conducted.

The Accounting Department administers the gross receipts tax for regulatory expenses paid on an annual basis by the utilities serving customers in South Carolina. The utilities are required to report their revenues received within the State. Tax assessments are based on these revenues.

The Accounting Department has prepared tables showing Operating Revenues, Operating Expenses, Net Operating Income, State and Local Taxes Paid, and Gross Plant in Service for Electric and Gas Utilities for the years 1990-1993. Operating revenues, Operating Expenses, Net Operating Income, and Gross Plant in Service are shown for Telephone Utilities for the year ending 1993. Operating Revenues, Operating Expenses, and Net Operating Income are shown for Water and Sewerage Utilities for the year 1993. Operating revenues and expenses are shown for transportation companies operating in South Carolina for the year 1993.

The Tables are as follows:

TABLE A - Privately Owned Electric Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Years Ended December 31, 1990-1993.

TABLE B - Gas Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the Fiscal and Calendar Years Ended 1990-1993.

TABLE C - Telephone and Telegraph Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For the year ended December 31, 1993.

TABLE D - Water and Sewerage Utilities Operating in South Carolina. Selected Statistics for South Carolina only. For Fiscal and Calendar Year 1993.

TABLE E - Transportation Companies Operating in South Carolina. Selected Statistics for Fiscal and Calendar Year 1993.

CONSUMER SERVICES DEPARTMENT

The Consumer Services Department was created in August 1991. Its function is to work with utilities and for hire motor carriers and their customers in an informal process to settle disputes and complaints; to enforce Commission Regulations; to increase the awareness of utility consumers of the Commission's role in public utility regulation; and to assist the Commission in the development of regulatory policies.

The Department has a Complaint In-Wats telephone line which provides consumers across the State with toll-free access to contact members of the Commission Staff and/or their Commissioners to express their views, discuss problems, register complaints and request information.

The Department receives, investigates and issues determinations and recommended resolutions in consumer complaints against regulated telecommunications, electric, gas, water and wastewater companies, and commodity and passenger motor carriers for hire. It is generally recommended that the consumers contact their utility prior to registering an informal complaint with the Commission in order to provide the utility the initial opportunity to resolve the problem.

Consumer Services provides an analysis of the complaint activity to monitor the utility and transportation companies' compliance with the Commission's Regulations governing the services provided to their customers. The following analysis classifies the complaints into one of seven categories: billing, service, inquiry, rate, regulatory, safety and miscellaneous.

II. UTILITIES DIVISION

The function of the Utilities Division of the Public Service Commission is to perform the necessary duties related to the regulation of utilities under the jurisdiction of the Commission. The management staff plans, coordinates, directs and supervises the work of its five departments as shown below:

Gas Department
Electric Department
Telecommunications Department
Water and Wastewater Department
Research Department

The activities of this Division for the fiscal year 1993-1994, affecting the various utility groups are summarized by each Department on the following pages of this report. 440 orders were issued through this Division during the fiscal year, and public hearings were held in connection with 55 of these orders.

A. GAS DEPARTMENT

There are four private corporate natural gas utilities serving customers in South Carolina. The rates and services of these utilities are subject to jurisdiction of the Public Service Commission. The natural gas utilities and the communities they serve are listed in the tables included in this report.

Natural gas brought into South Carolina is produced principally in the gas fields of Louisiana and Texas, including the offshore areas in the Gulf of Mexico. During the fall of 1978, our State started receiving gas from Algeria. Liquefied natural gas was transported from Algeria to a regasification plant and marine terminal located on Elba Island, which is near Savannah, Georgia. However, this plant operated by Southern Energy Company, presently is not receiving the shipments because the Algerian Government has terminated the contract for the supplies.

Gas is transported to South Carolina by two interstate pipeline companies: Transcontinental Gas Pipeline Company and Southern Natural Gas Company. Transcontinental's pipeline crosses the State in the northwest corner, passing just south of Anderson and Spartanburg, South Carolina, while Southern's pipeline enters and terminates in our State at a point near Aiken. All natural gas consumed in South Carolina is transported to the State by these two interstate pipelines which furnish gas to natural gas authorities, municipalities, and privately owned gas utilities.

The Federal Energy Regulatory Commission (FERC) has jurisdiction over rates and services of interstate pipeline companies and the price of natural gas sold and transported by interstate pipelines. These price fluctuations have a direct bearing on the cost for natural gas to the ultimate consumer in South Carolina.

Many communities in South Carolina are receiving natural gas through facilities owned by municipalities or gas authorities over which the Commission has no rate or service jurisdiction. However, the South Carolina Gas Safety Act of 1970 vested the Commission with pipeline safety jurisdiction over all gas system operators not subject to Federal Energy Regulatory Commission jurisdiction. Therefore, pipeline safety jurisdiction includes public utilities, municipalities, natural gas authorities, certain facilities operated by interstate companies, certain public housing authorities and others who purchase natural gas through a master meter for subsequent distribution to individual consumers, certain liquefied petroleum systems, and methane landfill facilities. As of June 30, 1994, the Commission's pipeline safety jurisdiction included a total of thirty-two (32) individual operators.

During calendar year 1993 representatives of the Commission spent 489 person days inspecting natural gas systems to ensure compliance with the South Carolina Gas Safety Act and the Minimum Federal Safety Standards for Natural Gas Pipelines. Three hundred (300) violations were found during these visits and, as of December 31, 1993, the Commission Staff verified compliance covering ninety-one (91) violations. The remaining violations necessitate continued monitoring to substantiate that they are corrected and brought into compliance with the Pipeline Safety Standards.

All four private gas utilities are operating under the provisions of curtailment plans designed to allocate gas on the basis of priority of service established by such factors as efficiency of use, safety considerations, consumer reliance, and alternate fuel availability.

Two factors showing the pace of activity by natural gas utilities are the average number of customers and the gross plant investment. The growth in total customers served by each privately owned gas utility is shown by one of the accompanying tables. The total of natural gas customers grew from 277,582 in 1989 to 314,922 in 1993 for an increase of 13.45 % over the five years.

The gas utilities filed no requests for a general increase in their rates during the fiscal year covered in this report. Rates were adjusted in accordance with approved purchased gas adjustment clauses which are designed to track changes in rates of interstate pipeline companies. One company adjusted rates during the winter period in accordance with a Weather Normalization Adjustment (WNA).

The Commission has issued Orders to all privately owned natural gas utilities, under the Commission's jurisdiction, establishing annual hearings to review the utilities' purchased gas adjustment procedures and gas purchasing policies. During this fiscal year the Commission completed these annual hearings for four (4) privately owned utilities.

Because of various changes in the regulatory policy at the federal level, the gas industry is going through considerable changes. The customers in our State are now permitted to purchase their own gas supplies and rely only on our gas utilities to transport the gas. The gas utilities also are permitted to secure their own system supply gas from sources other than the interstate pipelines.

FERC has issued Orders which have changed the function of interstate pipelines from a supplier to a transporter of gas. Recent Orders issued by FERC are designed to create a competitive, deregulated business in buying and selling gas on the interstate level. The local intrastate distributors will now have several different sources to secure their supplies from and the interstate pipelines will primarily only be used for transportation purposes.

In calendar year 1987 the Federal Energy Regulatory Commission (FERC) issued an order to the interstate pipelines whereby mechanisms were adopted for the recovery of buy-out and buy-down costs. These costs are associated with payments made by the interstate pipelines to producers to extinguish outstanding take-or-pay liability under existing contracts, or to reform the price, volume or the terms of the contracts. In the years following enactment of the Natural Gas Policy Act, interstate pipelines sought to obtain additional supplies, much of which were purchased under contracts incorporating substantial take-or-pay obligations. However at the same time gas prices were being driven up, demand for natural gas began to soften and the interstate pipelines began to incur take-or-pay obligations from the producers. Both interstate pipelines serving our State have begun to collect these charges from the natural gas distributors under the Commission's jurisdiction. The Commission has ruled that the gas distributors may recover the charges from their customers through their approved purchased gas recovery procedures.

The Commission has begun a review of the issue of Integrated Resource Planning (IRP) for gas utilities and Orders have been issued requiring the filing of Integrated Resource Plans by the individual gas utilities. IRP involves a process to develop a plan for the gas distributors that results in the minimization of the long run total costs of the systems and which produces the least cost to the consumers consistent with the availability of an adequate and reliable supply of gas while maintaining system flexibility and consideration of environmental impacts.

B. ELECTRIC DEPARTMENT

The Electric Department, operating through the Utilities Division, is responsible for providing the Commission with data and information necessary for the regulation of all privately-owned electric utilities operating in South Carolina. This regulation of the electric utilities is designed to provide adequate service at reasonable rates to the people of South Carolina while assuring that these utilities are provided an opportunity to earn a reasonable rate of return on the fair values of properties devoted to the public service.

AVAILABILITY OF ELECTRIC POWER

Carolina Power and Light Company, Duke Power Company, and South Carolina Electric and Gas Company, the three major utilities serving the State are planning or building new generating plants, transmission and distribution lines so that adequate electric power will be available for present customers and those who select to locate within the State.

South Carolina customers are receiving power from the Clarks Hill Project, the Hartwell Project, and the Richard B. Russell Project through the transmission lines of the South Carolina Public Service Authority, Duke Power Company and South Carolina Electric and Gas Company.

The VACAR Group of the Southeastern Electric Reliability Council is a group of electric utilities operating in Virginia, North Carolina and South Carolina and includes Carolina Power and Light Company, Duke Power Company, South Carolina Electric and Gas Company, South Carolina Public Service Authority, Virginia Power Company, as well as two smaller utilities (Yadkin and SEPA). This Council was formed to increase reliability of bulk electric power supply to the region and is one of the national groups which makes up several area councils. These companies exchange information on planning, construction, system loads and other matters affecting the bulk power supply within the area.

All three utilities are also purchasing power from small power producers and cogenerators as required by the Federal Energy Regulatory Commission under the Public Utility Regulatory Policies Act of 1978 (PURPA) to meet system loads while encouraging conservation and efficient use of energy resources.

GENERAL RATE INCREASES

The South Carolina electric consumer, after having enjoyed continually decreasing costs from 1931 to 1969, has seen increases in rates beginning in 1970. The increasing cost of money, construction, fuel and other items which go into the

cost of providing electric service have dictated the need for the Commission to grant rate increases to the utilities under its regulation. These increases are designed to insure that the Companies will be able to continue to provide adequate and reliable service and also recover the prudently incurred costs to serve the increasing demand.

Carolina Power and Light Company filed for an increase in February 1987 to cover a portion of the cost of the Harris Nuclear Plant and filed the companion request in March 1988. CP&L's last general rate increase occurred in August 1988.

Duke Power Company's last general rate increase was granted in November 1991 to include costs associated with the new Bad Creek Hydro facility.

South Carolina Electric and Gas Company's last general rate increase was granted in June 1993. This two-phase rate increase effective June 1993 and June 1994 included costs associated with system growth, system improvements, environmental requirements and construction costs relating to the coal-fired Cope Electric Generating Station.

INTEGRATED RESOURCE PLANNING (IRP)

It is believed that good planning and management have provided South Carolina with adequate electric power in the past and that the organizations which generate and sell electric power in South Carolina will continue to provide adequate power at reasonable rates for the present and future needs of the State. In order to assist in the accomplishment of these goals the Commission, in 1987, began general proceedings to establish a framework for Least Cost/Integrated Resource Planning (LCIRP) development. A conference was held in October 1988 and was jointly sponsored by the North Carolina Public Utilities Commission and the South Carolina Public Service Commission with the North Carolina Alternative Energy Corporation as the Coordinating Agency. The purpose of the conference was to explore the areas of LCIRP from which a cohesive plan might be developed independently for each State while sharing the same background and resources.

The Commission issued procedures in 1991 requiring the utilities to file Integrated Resource Plans (IRPs). The Commission has authority to require filing of IRPs by utilities and to require other actions to implement integrated resource planning in South Carolina.

The objective of the IRP process is the development of a plan that results in the minimization of the long run total costs of the utility's overall system and produces the least cost to the consumer, consistent with the availability of an adequate and reliable supply of electricity while maintaining system flexibility and considering environmental impacts. In

conjunction with the overall objective, the IRP should contribute toward the outcomes of improved customer service, additional customer options, and improved efficiencies of energy utilization.

Pursuant to the procedures, each utility was required to file a detailed 15 year IRP every three years beginning in April 1992. The IRP filing must contain a statement of the utility's long-term and short-term objectives and how these objectives address the overall objective of the IRP process as stated by the Commission. The filing must also indicate how the utility's resource plans seek to ensure that the utility incorporates the lowest cost options for meeting the consumers' electricity needs consistent with the availability of an adequate and reliable supply of electricity. Some other requirements of the utility's IRP filing include the evaluation of the cost effectiveness of each supply-side and demand-side option, consideration of the environmental costs of the plan, a demand and energy forecast, a discussion of risk assessment associated with the plan, transmission improvements and/or additions necessary to support the plan, evaluation and review of existing demand-side options utilized by the utility as well as discussion of future demand-side and/or supply-side options.

Finally, the IRP procedures require that the Commission review a utility's IRP filing to evaluate the extent of compliance with the Commission's procedures for the specific purpose of determining whether the plan is reasonable at that point in time. The Commission is also to review and determine whether the options selected and incorporated within the IRP are consistent with the Commission's procedures and whether such options have been justified by the utility within its IRP filing. The Commission does not intend to dictate to utility management the specific options that should be adopted as part of the IRP. The utility must maintain responsibility for its performance regarding the implementation of the selected resource options. When the Company seeks to recover its costs, the Commission will determine whether the costs, incurred over time, resulting from implementing each chosen option are reasonable. The Commission may also review the appropriateness of the Company's implementation process for each option. The IRP procedures provide that a utility may file a cost recovery plan with the Commission for approval.

During April 1992, CP&L, Duke, and SCE&G each filed their 1992 IRP with the Commission consistent with the requirements of the Commission's IRP procedures. During early 1993, the Commission issued orders ruling on each of these plans.

The Commission also required that each utility file a Short Term Action Plan (STAP) as a separate document in the two intervening years by April 30th. The STAP is a status report on the implementation of each Company's IRP. CP&L, DUKE, and SCE&G have each filed its STAP for 1992 and 1993. Lockhart Power is not required to file a STAP.

During 1995, each Company will be filing its next IRP. SCE&G will file by February 28th. Duke Power will file by April 30th. Carolina Power and Light will file by June 30th. Lockhart Power is required to file each subsequent IRP by June 30th.

RATES

During 1993, the 881,858 residential customers in South Carolina served by the privately-owned electric utilities paid \$900,966,547 for 12,304,299,000 KWH of electricity. The average South Carolina residential customer used 13,953 KWH annually at an average cost of \$1,021.67 or 7.32 cents per KWH, a 7.20% increase in usage, a 9.56% increase in a total bill and an increase of 2.23% in cost per KWH from 1992. In comparison, the average United States consumer used 9,322 KWH annually at an average cost of \$810.41 or 8.69 cents per KWH, a 4.03% increase in usage, a 4.77% increase in total bill, and a 0.70% increase in cost per KWH from 1992.

Four graphs have been prepared and are included in this report comparing residential electric consumption. The first two show the average cost and average use for customers served by the three large privately-owned utilities operating in South Carolina. The remaining two compare the average cost and average use of South Carolina consumers with the average United States consumer.

There were 147,595 commercial and small power customers of the privately-owned utilities who purchased 9,787,792,000 KWH at an average rate of 6.11 cents per KWH, compared to the national average of 7.85 cents per KWH.

The 3,559 industrial customers of the privately-owned utilities in South Carolina purchased 19,772,935,000 KWH at an average rate of 4.29 cents per KWH, compared to the national average of 5.03 cents per KWH.

Industries now located within South Carolina and those desiring to move into the State will find that electric power can be secured throughout practically the entire State.

TERRITORIAL ASSIGNMENT ACT

The General Assembly passed the "Territorial Assignment Act" in 1969 and the Commission, pursuant to the Act has required all "electric suppliers" to file maps with the Commission showing distribution electric lines in existence as of July 1, 1969. As of July 1, 1971, mylar maps of all counties in South Carolina had been filed with the Commission and negotiations between the "electric suppliers" was begun.

Territory in most of South Carolina has been agreed upon by "electric suppliers" and Orders approving the assignment of the territory have been issued by the Commission.

SITING ACT

The 1971 General Assembly passed an Act to give the Commission authority over "UTILITY FACILITY SITING AND ENVIRONMENTAL PROTECTION" effective January 1, 1972.

The three major utilities are now providing for the Commission, on an annual basis, a report containing a ten-year forecast of loads and resources including probable construction.

C. TELECOMMUNICATIONS DEPARTMENT

The Telecommunications Department of the Utilities Division is responsible for the work necessary for the regulation of rates, compliance with tariffs, and quality of service pertaining to twenty eight (28) local telephone companies, one hundred twenty five (125) companies that are certificated to provide long distance services, twenty eight (28) companies that are certificated to provide cellular services, and seven (7) radio common carriers.

To be able to better serve the needs of the customer, who expects better service without delays, equipment failures, or inaccurate billing, the Staff is constantly monitoring the operations of the one hundred and eighty eight (188) telecommunications companies under the regulation of the Commission. These inspections and procedural evaluations are in the form of central office inspections, cable tests, safety inspections, complaint visits, payphone inspections, and compliance reviews pertaining to business office and general operations of the Companies. Sixty two (62) facilities and safety inspections were performed during the year to determine the condition of equipment and the grade of service being rendered. The Staff performed twenty (26) compliance reviews and two hundred and forty (240) paystation inspections to determine the companies' level of adherence with the various tariffs, regulations and guidelines set forth by the Commission. These three hundred and twenty eight (328) inspections are a vital part of the department's overall function.

The Staff maintains an updated file on all tariffs, Commission Orders, territorial maps, and other pertinent data. The Department was involved in thirty three (33) formal hearings involving telecommunications companies. In addition, three hundred and forty (340) tariff filings covering new services or changes in language were reviewed by the Staff and approved by the Commission.

The telecommunications companies have continued to make large investments to improve their central offices, outside plant, and toll equipment in an endeavor to cope with their constantly expanding and changing subscriber base and the subscribers' desires for new and innovative telecommunication services. The Staff has strived to stay abreast of the needs of the subscriber and the changing industry by maintaining a close working relationship with the Companies in order to better serve all affected parties.

**GROWTH OF TELEPHONE UTILITIES IN
SOUTH CAROLINA**

YEAR	GROSS OPERATING REVENUE (MILLIONS)	GROSS PLANT INVESTMENT (MILLIONS)
1966	83.1	394.1**

D. WATER AND WASTEWATER DEPARTMENT

The majority of water and wastewater utilities operating in the State of South Carolina are owned and operated by municipalities, counties, public water and sewer districts, public water and sewer authorities and Commission of Public Works. These utilities are exempt, by state statute, from jurisdiction of the Public Service Commission. As of June 30, 1994, there are 171 water systems, 134 wastewater systems and 78 combined water and wastewater systems operating under 91 companies regulated by the Public Service Commission of South Carolina.

There were two (2) new water or wastewater utilities granted Certificates of Public Convenience and Necessity during the fiscal year, and one (1) system transferred to utilities not regulated by this Commission.

More stringent demands by state and federal agencies, higher operating and maintenance costs, wages and supplies, caused nine (9) water and wastewater companies, operating in this state, to apply to the Commission for authority to increase their rates and charges for water and wastewater service.

As prescribed by law and after proper advertisement, public hearings were held on each application for adjustments in water and wastewater rates and charges.

Prior to issuing a Certificate of Public Convenience and Necessity to a water and wastewater utility, the Commission, among other items, required a performance bond in accordance with Section 58-5-270 of the 1976 Code of Laws of South Carolina as amended, complete cost and rate data, approval of adequate design, and supply potential, plat of proposed service area and copy of engineering plans and specifications.

D. RESEARCH DEPARTMENT

The Research Department provides the Commission with specific data and economic and financial analyses necessary for the regulation of firms under the Commission's jurisdiction. The Department presents testimony and exhibits regarding the allowable rate of return on common equity for utilities, and also at various times provides energy and peak demand forecasts for electric utilities regulated by the Commission. The Department is active in assisting in the development of Commission policy regarding new and emerging issues in a dynamic regulatory environment. These issues include utility diversification, third-party power purchasing by electric utilities, intralata toll competition in telecommunications, costing and pricing of services within a more competitive environment, integrated resource planning, cross subsidization, weather normalization, and compliance with State and Federal energy statutes. The Department is specifically involved in electric, natural gas, and telecommunications issues.

The Department develops estimates of the allowable rate of return on common equity based on analyses of investor expectations. Also the Department has, in the past, developed forecasts of energy usage and peak demand for ten to twenty years into the future. To properly carry out these responsibilities, the Department must seek to employ state-of-the-art financial and economic methodologies and techniques. The Department estimates the rate of return of a utility by relying on financial techniques such as the Discounted Cash Flow and the Capital Asset Pricing Model. Forecasts have been developed through the use of Econometric modeling techniques, including multiple regression and input/output models.

The Research Department also reviews proposals by the various regulated utilities pertaining to the issuance of long-term debt, preferred stock, common equity, and other forms of financing. In addition, quarterly reports are developed and provided by the Research Department to the Commission on the cost of equity for the ten major regulated utilities operating in South Carolina. These reports enable the Commission to monitor the impacts of changing economic and financial conditions on the risk and expected return of the utilities. The Department has testified in excess of seventy times on the rate of return since it was established in 1977. Since its creation, the Research Department has also been involved in administering management audits of

certain utilities operating in South Carolina; and, administering various Federal grants from the Department of Energy.

The Research Department reviews trends in costs, revenues, earnings per share, dividends per share, market price, book returns, bond yields, capital structure, market-to-book ratios, dividend yields, and other items as part of its analysis of the business risk, financial risk, and market risk and financial conditions of each major utility regulated by the Commission. The Department also monitors trends in overall economic indicators such as Gross National Product, Standard and Poor's 500 Market Index, interest rates, bond yields, and inflation rates. Regional and State economic conditions are also reviewed to provide a better understanding of the environment in which the regulated utilities operate in South Carolina.

III. TRANSPORTATION DIVISION

The functions of this Division are to enforce the South Carolina Motor Vehicle Carrier Law, 1976, as amended, and the Commission's Rules and Regulations Pertaining to Motor Carriers. The Law provides for the regulations, supervision and control of persons, firms, corporations, etc., operating motor vehicles used in the business of transporting persons or property for compensation over the highways of the State, and imposes license fees to cover the cost of administration. Fees Collected by the Registration Department and Licensing Department totaled \$3,674,210.64.

The Transportation Division consists of the following five Departments:

- Licensing Department
- Rates Department
- Law Enforcement and Safety Department
- Interstate Registration Department
- Rails and Rail Safety Department

A. LICENSING DEPARTMENT

The Licensing Department of the Transportation Division consists of the following three sections:

Certificate Section
Insurance Section
License Decal Section

1. CERTIFICATE SECTION

The responsibilities of the Certificate Section are to process all applications, to acquire new, to amend existing, to transfer, to suspend, or to cancel Certificates of Public Convenience and Necessity for the transportation of persons or property.

There are presently 1,449 intrastate and 601 interstate only motor carriers holding Certificates of Public Convenience and Necessity granted by the Commission, as follows:

<u>CLASS</u>	<u>INTRASTATE CARRIERS</u>	<u>INTERSTATE ONLY CARRIERS</u>	<u>TYPE OF CARRIER</u>
A	14	0	Common carrier transporting passengers over regular routes and on regular schedules.
B	1	0	Common carrier transporting passengers not over regular routes or on regular schedules.
C	317	16	Common carrier - taxicabs and charter buses - not operating over regular routes or on regular schedules.
D	3	3	Common carrier transporting property over regular routes and on regular schedules.
E	988	563	Common carrier transporting property over irregular routes and on irregular schedules.
F	126	19	Contract carrier transporting property over irregular routes and on irregular schedules.

Notices of Filing, which must be published in newspapers of general coverage in the affected service areas, are prepared on Applications for Class A, Class C-Charter, Class D, Class E and Class F, for new authority and to transfer or amend existing authority. Notices of Filing were prepared on 178 Applications during this fiscal year and 12 public hearings were held, as indicated below:

HEARINGS HELD DURING 1993-1994 FISCAL YEAR

The Certificate Section processed and issued 790 Orders during the fiscal year. The majority of the Orders involved the issuance of Certificates of Public Convenience and Necessity, which are only issued after the motor carrier has filed all applicable insurance, rates, license decal fees and achieved a satisfactory safety rating.

There were 806 Certificates of Public Convenience and Necessity processed during the fiscal year, as outlined below:

TOTAL CERTIFICATES PROCESSED	2	175	0	596	33	806

2. INSURANCE SECTION

The function of the Insurance Section is to maintain the insurance filings made by for-hire intrastate motor carriers and interstate motor carriers who base equipment in South Carolina. There are approximately 1,700 motor carriers who are required to file evidence of bodily injury and property damage liability insurance. Of these carriers, approximately 1,000 are required to file evidence of cargo insurance.

The Insurance Section maintains a suspense file for approximately 60 days on insurance filings for which an application is not pending. Upon receipt of an application, the filing is accepted.

The Insurance Section notifies regulated carriers of an impending thirty (30) day notice of cancellation of insurance and if no other coverage has been filed within that time limit, the motor carrier must cease operations on the date stated in such letter.

Prior to the issuance of a Certificate of Public Convenience and Necessity and the rendition of motor carrier service authorized therein, evidence of the required insurance must be on file with the Commission. Once licensed, motor carriers must keep insurance on file continuously. Motor carriers who fail to keep insurance on file are subject to having their Certificates revoked and cancelled by the Commission.

3. LICENSE DECAL SECTION

Motor Carriers operating within the State of South Carolina on an intrastate basis and carriers based in South Carolina operating on an interstate basis are required to purchase license decals based on vehicle carrying capacity or empty weight, ranging in price from \$7.50 to \$125.00 annually. These license decals are evidence of the motor carrier's compliance with the Motor Vehicle Carrier Law.

PUBLIC SERVICE COMMISSION LICENSE DECALS ISSUED BY CLASS:

CLASS A LICENSE.....	24
CLASS B LICENSE.....	0
CLASS C LICENSE.....	2,287
CLASS D LICENSE.....	60
CLASS E LICENSE.....	15,786
CLASS F LICENSE.....	775
 TOTAL LICENSE DECALS ISSUED.....	 18,932

TOTAL LICENSE DECAL FEES (NET)..... \$1,312,000.64

With the growth of the motor carrier industry in this State, together with the better enforcement of the Motor Carrier Law made possible by increased enforcement facilities, the number of licenses issued and fees collected have increased significantly. The fees collected are deposited in the State General Fund and used to finance the operations of a portion of the Transportation Division.

B. RATES DEPARTMENT

The Transportation Rates Department is responsible for the administration of the Commission's Rules and Regulations, Policies and Procedures pertaining to services and tariffs of for-hire motor carriers, certain railroad matters and the transit operations of South Carolina Electric & Gas Company and Duke Power Company.

Applications or tariff filings for establishment of or changes in rates, fares, charges, classifications, rules or practices involving the transportation entities operating intrastate in South Carolina are processed through this department. Each application is analyzed and prepared for presentation to the Commission for disposition. Tariff files are kept for the one thousand plus motor carriers in this department.

Notices of and Applications for changes in railroad lines, agency stations and non-agency stations and the establishment of or changes in Mobile Agencies are processed in this office.

The city buses in Columbia and Charleston are operated by South Carolina Electric and Gas Company and the city buses in Anderson and Spartanburg are operated by Duke Power Company. Applications for changes in bus fares, routes, time schedules and other services are processed and prepared for Commission disposition by this department. On site inspections of bus services are conducted every six months.

During the year, 540 Applications for motor carrier and railroad contract or tariff changes were presented to the Commission for action.

C. LAW ENFORCEMENT AND SAFETY DEPARTMENT

The Law Enforcement and Safety Department consists of the following sections:

Law Enforcement Section
Motor Carrier Safety Unit

1. LAW ENFORCEMENT SECTION

The enforcement of the Motor Vehicle Carrier Laws of the State, Section 58-23-10 through 58-23-60 of the South Carolina Code of Laws, 1976, as amended, is carried out by the staff of twenty-one inspectors stationed throughout the State. During Fiscal Year 1993-1994, these Inspectors made a total of 1,960 arrests with a total of \$194,975.25 in fines.

All of the Inspectors are commissioned by the South Carolina State Law Enforcement Division and all have attended or will attend in the near future, the South Carolina Criminal Justice Academy as required by law. They wear uniforms and patrol in marked cars with two-way radios. Their duties and responsibilities are to insure that the motor carriers under the jurisdiction of the Public Service Commission comply with the South Carolina Motor Vehicle Carrier Law and the Commission's Rules and Regulations Pertaining to Motor Carriers. The Inspectors investigate violations, issue warrants of arrests, initiate legal proceedings for violations and work with the regulated carriers and with the public in helping them comply with the law.

1992-93	1,190	\$ 94,475.00
1993-94	1,960	\$194,975.25

2. MOTOR CARRIER SAFETY UNIT

The Motor Carrier Safety Unit was transferred to the Department of Public Safety, effective July 1, 1993.

D. INTERSTATE REGISTRATION DEPARTMENT

Section 58-23-640 of the South Carolina Code of Laws (1976), governing the operation of interstate carriers certificated by the Interstate Commerce Commission and interstate exempt commodity carriers, authorized the South Carolina Public Service Commission to promulgate rules and regulations pursuant to this Act. The Rules promulgated complied with the standards as recommended and approved by the National Association of Regulatory Utility Commissioners and the Interstate Commerce Commission.

Section 58-23-650 of the South Carolina Code of Laws (1976) allows the South Carolina Public Service Commission to enter into reciprocal base state agreements with the regulatory agencies of other states having jurisdiction over motor carriers and provides that motor carriers registering in this state under such agreements are subject to the jurisdiction of the Public Service Commission. The program established pursuant the Intermodal Surface Transportation Efficiency Act of 1991 is known as the Single State Registration System (SSRS). The South Carolina Public Service Commission is mandated to collect fees for South Carolina based carriers and carriers in non-participating states who select South Carolina as their registration state. The South Carolina Public Service Commission is mandated to collect and disburse fees back to other participating SSRS states.

The function of the Interstate Insurance Section is to maintain the insurance filings made by for-hire interstate motor carriers.

The Insurance Section notifies exempt carriers of an impending thirty (30) day notice of cancellation of insurance and if other coverage has not been filed within that time limit, the motor carrier must cease operation on the date stated in such letter.

Carriers coming under this category are charged a registration fee of \$25.00, with amendments to the authority as registered, \$10.00. Mobile home transporters are charged one-half the amendment fee or \$5.00. All motor carriers operating into or through South Carolina under Section 58-23-640 must purchase an identification stamp at \$5.00 per vehicle.

Under the same Section, all exempt carriers operating into or through South Carolina must file a letter with this Commission setting forth their exemption. Fees are identical to those of certificated carriers.

During the period of July 1, 1993 through December 31, 1993, 1,016 certificated carriers registered their authority with this Commission. Prior registrants were 24,852; total carriers on file 25,868. There were 7 registrants of additional authority.

For the same period, 601 exempt motor carriers registered their letters of exemption. Prior registrants were 6,373. Exempt carriers cancelled were 1,877, making the total 4,496.

Revenues From Certificated Carriers	\$128,720.00
Revenues From Exempt Carriers	\$55,045.00
Revenues from SSRS Carriers	\$2,178,445.00
TOTAL REVENUE	\$2,362,210.00

TOTAL REVENUE SOUTH CAROLINA PUBLIC SERVICE COMMISSION COLLECTED AND DISBURSED TO PARTICIPATING SSRS STATES	\$1,329,706.10
---	----------------

E. RAILS AND RAIL SAFETY DEPARTMENT

The Rail Safety Program was initiated to enforce the safety rules and regulations of the State of South Carolina. The program was certified by the Federal Railroad Administration in 1980 pursuant to the Federal Railroad Safety Act of 1970 (45 U.S.C. 435 (d) and 49 C. F. R. 212.33). The program consists of a Chief, a Motor Power and Equipment Inspector and a Track Inspector. The Motor Power and Equipment Inspector is responsible for the inspection and safety compliance of the thousands of pieces of rolling stock of the railroads. The Track Inspector is responsible for all phases of track inspection and safety compliance for the 2,100 plus miles of track in South Carolina.

The Rails and Rail Safety Department investigates train derailments to determine a cause, investigates crossing accidents where a train or railroad vehicle and a pedestrian or vehicle are involved and also checks general complaints from the public.

During the past year, 3,621 miles of track were inspected in the State, 72 miles of which were visually inspected on foot. These track inspections resulted in 269 defects found and corrected. Also, 1,629 records inspections were performed with 48 deficiencies noted. Additionally, 1,086 turnouts and 649 derails were inspected and 98 defects found.

On equipment inspections, there were 10,886 inspections made on rolling stock with a total of 1,148 defects found. There were 283 record inspections performed, 43 train air brake test observed, 9 single car test observed and 43 blue signal inspections performed.

RAILROAD COMPANIES OPERATING IN SOUTH CAROLINA

Year Ending December 31, 1993
